2019

EIP 3

INKERS

Administrative Stuff:

1. Make sure you have a Google Colab Account
2. You'll soon get access to the LMS, please add your profile details and use it for viewing your content, assignments, and discussions.
3. Phase 1 ends after 5 sessions. You need to be in the top 50 percentile to move to Phase 2.
4. Every session ends with an assignment, and the test will be conducted after session 5 ends.
5. Discussions on the forum are monitored, and those helping others will get additional bonus points, which may help in clearing the Phase I.
- 6.

External Internship Program

1. We have 2 hours of 14 sessions, spread over 80-90 days (including all 3 Phases).
2. 2 hours per session is really too less to become a master.
3. Our aim is to get you started, covering the fundamentals. Unless you spend at least 3-4 hours on your own, reading or doing stuff, this program would fail for you.
4. Assignments are designed for this specific purpose. Since 95+% are from industry, there might be some resistance to become a student again, but let's try!
5. Our relation with you is "Driving Instructor - New Driver" and not of "Professor - Student". This means our focus is on to help you drive the car, not to understand it's internal fundamentals (a rule we will break many times).
